Source: Security Forces Coordination Office, 2004.
Note: (1) Figures include offenders of all nationalities.
(2) Figures for offenders aged 21 or above are aggregate for both sexes, and include persons of unidentified status.

In the period from January to December 2003, the number of offenders aged 13 or above stood at 9,739. Amongst these, 148 were aged 13-15 ( $1.5 \%$ of total number of Offenders across all the above age groups), 285 were aged between 16-18 ( $3 \%$ of total), and 184 were aged 19-20 ( $1.9 \%$ of total).

Amongst all the offenders aged 13-20, the majority (263 persons) committed offences against property, and the second biggest group of offenders committed offences against the person (212). For both types of crime, male offenders outnumbered female offenders.

Figure 17: Analysis of Offenders By Major Types of Offence (2003)

### 7.2 Reasons for Committing Crime and Classification

Table 7.2a: Employment Status of Guardians of Young Offenders in Macao (1992-1998) ${ }^{(1)}$

| Year <br> Occupation | 1992 | 1993 | $1994^{(2)}$ | 1995 | 1996 | 1997 | $1998^{(3)}$ |

| Unemployed | 4 | 4 | 4 | 12 | 28 | 20 | 5 |

Source: Penny Y.Y. Chan, 1999, p.91.
Note: (1) Guardians refer to both father and mother, or single father or mother, step father or step mother, or relatives.
(2) Includes three cases in 1995.
(3) For the period January-July 1998.

For the period from1992 to 1998, the parent(s) or guardian(s) of young offenders were mostly workers; followed by drivers, security guards and police officers. During the period 1995-1997, the unemployment situation for parent(s) or guardian(s) of young offenders aggravated substantially. (Penny Y.Y. Chan, 1999, p.78)

Table 7.2b: Family Income of Young Offenders in Macao (1992-1998)
Number of Persons

| Income (MOP) Year | 1992 | 1993 | $1994^{(1)}$ | 1995 | 1996 | 1997 | $1998^{(2)}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\$ 0-1,000$ | 5 | 1 | 1 | 3 | 1 | 1 | 1 |
| $\$ 1,001-2,000$ | 13 | 4 | 3 | 5 | 11 | 3 | 2 |
| $\$ 2,001-3,000$ | 19 | 21 | 15 | 16 | 19 | 10 | 1 |
| $\$ 3,001-5,000$ | 29 | 30 | 30 | 9 | 15 | 19 | 3 |
| $\$ 5,001-10,000$ | 10 | 14 | 10 | 7 | 8 | 5 | 1 |
| $\$ 10,001-15,000$ | 1 | 1 | 1 | 3 | 2 | 2 | 1 |
| $\$ 15,001-20,000$ | 1 | 5 | 2 | 5 | 4 | 6 | 2 |
| $\$ 20,001$ or above | 1 | 3 | 1 | 2 | 5 | 3 | 1 |

Source: Penny Y.Y. Chan, 1999, pp. 91 \& 92.
Note: (1) Includes three cases in 1995.
(2) For the period January-July 1998.

Family income of young offenders from 1992 to 1998 was mostly in the range of MOP 2,001-5,000. (Penny Y.Y. Chan, 1999, p.78)

Table 7.2c: Young Offenders in Macao by Family Type (1992-1994)
Number of Persons

| :---: | :---: | :---: | :---: |
| Both Parents Surviving | 43 | 43 | 26 |
| Single Parent | 14 | 13 | 6 |
| Both Parents Missing | 16 | 11 | 9 |

Source: Penny Y.Y. Chan, 1999, p.92.
Note: (1) Includes three cases in 1995.

## Table 7.2d: Young Offenders in Macao by Family Type (1995-1998)

Number of Persons

| Type Year | 1995 | 1996 | 1997 | $1998^{(1)}$ |
| :---: | :---: | :---: | :---: | :---: |
| Both Parents Surviving | 23 | 31 | 16 | 3 |
| Single Parent | 18 | 22 | 17 | 2 |
| Step Father/ Step Mother | 10 | 13 | 15 | 2 |
| Under the Care of Relatives | 4 | 9 | 2 | 2 |

Source: Penny Y.Y. Chan, 1999, p.92.
Note: (1) For the period January-July 1998.
Young offenders in Macao came mainly from single-parent families, or where one of the parents have remarried, or where both parents have gone missing. This reflects that these young offenders have been raised in broken families. (Penny Y.Y. Chan, 1999, p.78)

Table 7.2e: Behaviour of Macao's Young Offenders at Home (1992-1998)
Number

| Behaviour Year | 1992 | 1993 | $1994^{(1)}$ | 1995 | 1996 | 1997 | $1998^{(2)}$ |

| Stay Overnight in <br> Places Outside Home | 21 | 12 | 14 | 18 | 28 | 16 | 3 |
| Often Run Away from <br> Home | 15 | 5 | 4 | 8 | 10 | 13 | 1 |

Source: Penny Y.Y. Chan, 1999, p.92.
Note: (1) Includes three cases in 1995.
(2) For the period January-July 1998.

A greater number of parents and guardians reported that the young offenders had been behaving unruly at home, and many of them considered they themselves too busy to teach and discipline their children. Although some parents did say that their delinquent children had been well behaved at home, these are only rare exceptions. The more common deviant behaviours of young offenders at home include: quarrelling with family members frequently, often staying overnight in places other than home, and running away from home from time to time. (Penny Y.Y. Chan, 1999 report, p.78)

Table 7.2f: Young Offenders in Macao by Education/Employment Status (1989-1998)

Source: Penny Y.Y. Chan, 1999, p.93.
Note: (1) Includes three cases in 1995.
(2) For the period January-July 1998.

During the period from 1989 to 1993, Macao's young offenders were mostly school drop-outs who could not find any job. These accounted for as much as $40-50 \%$ of the total number of young offenders, but the figure has declined to 20-40\% for the subsequent period of 1994-1998. (Penny Y.Y. Chan, 1999, p.78)

Table 7.2g: Young Offenders in Macao by Performance in School (1992-1998)

| Violent | 12 | 13 | 5 | 14 | 18 | 13 | 3 |

Source: Penny Y.Y. Chan, 1999, p.93.
Note: (1) Includes three cases in 1995.
(2) For the period January-July 1998.

The young offenders generally performed poorly at school. Their conduct was unsatisfactory as well. They tended to disobey their teachers, were disruptive in class and sometimes even displayed violent behaviours. (Penny Y.Y. Chan, 1999, p.78)

Table 7.2h: Young Offenders in Macao by Peer Relationship (1992-1998)

Note: (1) Includes three cases in 1995.
(2) For the period January-July 1998.

The young offenders seldom participate in healthy recreational group activities. Most of them would frequent electronic games centres, and for the rest of the time when they stay home, they just watch TV or listen to music. A fair number of them also like singing in karaoke bars. (Penny Y.Y. Chan, 1999, p.78)

### 7.3 Drug Addiction and Substance Abuse

Table 7.3a: Statistics on Young People Illegal Drug Trafficking (2003) ${ }^{(1)}$

Source: Security Forces Coordination Office, 2004.
Note: (1) Figures for the period January-December 2003 and include Macao residents only.

For the period from January to December 2003, 24 of the illicit drug traffickers arrested were aged $13-29$, of whom 18 were male ( $75 \%$ of total number across all age groups) and 6 were female ( $25 \%$ of total). The majority of these trafficked in heroin or marijuana, with 9 offenders in each category and together made up $75 \%$ of the total. Only 2 offenders were involved with ketamine, accounting for $8.3 \%$ of the total.

Most young illicit drug traffickers fell in the older age groups. Of all such offenders in 2003, 10 were aged 2024 ( $41.7 \%$ of the total), 9 were aged $25-29$ ( $37.5 \%$ of the total). These two age groups together made up $79.2 \%$ of the total number of young drug traffickers.

Figure 18: Statistics on Young People in Illegal Drug Trafficking (2003)

Table 7.3b: Statistics on Young Drug Abusers (2003)

Source: Security Forces Coordination Office, 2004.
Note: (1) Figures for the period January-December 2003 and include Macao residents only.

For the period from January to December 2003, 31 drug abusers were aged 13-29, of whom 14 were aged 20-24, another 14 were aged $25-29$ (each accounting for $45.2 \%$ of the total); 2 were aged $15-19$, accounting for 6 . $5 \%$ of the total; and 1 was aged 13-14, accounting for $3.2 \%$ of the total.

Of the 31 drug abusers, the majority smoked marijuana, with the figure standing at $14(45.2 \%$ of the total number of abusers). 8 used controlled substances ( $25.8 \%$ of total), 5 used ketamine ( $16.1 \%$ of total), and 4 used heroin ( $12.9 \%$ of total). There were more abusers in the 20-24 and 25-29 age groups who used controlled substances, with the figure for each group standing at 14 , and together made up $90.4 \%$ of the total.

Source: Social Welfare Bureau, 2004.

In 2003, 76 persons aged 13-29 sought help from the Drug Treatment Complex Centre under the Social Welfare Bureau. The majority of these were male (63), with only 13 females. They were mostly single (65). An analysis of their place of birth showed that a greater number of them were born in mainland China (37), the second largest group being Macao natives (35). The greater number of those asking for help used heroin (59), and mainly by intravenous injection (34). Those seeking help had mostly just completed primary education, the number being 39. With regard to their occupation, a greater proportion of drug abusers were unemployed (50), and only a handful were students (5).

### 7.4 Changes in Statistics on Offenders in Young Offenders Institute and Prisons

Table 7.4a: Changes in Number of Residents in Macao Young Offenders Institute (2003)

|  | Male |  |  |  | Female |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Admission | Release | Stay | Admission | Release | Stay |
| Aged 13 | $4(21.1)$ | $0(0.0)$ | $7(9.3)$ | $0(0.0)$ | $0(0)$ | $1(5.9)$ |
| Aged 14 | $4(21.1)$ | $1(6.7)$ | $11(14.7)$ | $2(33.3)$ | $1(20.0)$ | $3(17.6)$ |
| Aged 15 | $7(36.8)$ | $1(6.7)$ | $25(33.3)$ | $1(16.7)$ | $1(20.0)$ | $6(35.3)$ |
| Aged 16 | $1(5.2)$ | $3(19.975)$ | $14(18.7)$ | $3(50.0)$ | $3(60.0)$ | $6(35.3)$ |
| Aged 17 | $3(15.8)$ | $3(19.975)$ | $11(14.7)$ | $0(0.0)$ | $0(0.0)$ | $1(5.9)$ |
| Aged 18 | $0(0.0)$ | $3(19.975)$ | $4(5.3)$ | $0(0.0)$ | $0(0.0)$ | $0(0.0)$ |
| Aged 19 | $0(0.0)$ | $1(6.7)$ | $1(1.3)$ | $0(0.0)$ | $0(0.0)$ | $0(0.0)$ |

| Total | $19(100)$ | $15(100)$ | $75(100)$ | $6(100)$ | $5(100)$ | $17(100)$ |

Figures in parentheses represent percentages of the total in the respective category.
Source: Young Offenders Institute, 2004.
During the period from January to December 2003, there were 92 delinquents detained in Young Offenders Institute in Macao, of whom 75 were male and 17 were female. Among the male offenders, the majority were aged 15 , accounting for $33.3 \%$ of the total number of male probationers. Among the female delinquents, the majority were aged 15 or 16 , with each of the group accounting for $35.3 \%$ of the total number of female probationers.

During that period, there were 25 new admissions into Young Offenders Institute across Macao, of whom $76 \%$ were male and $24 \%$ were female. The percentage of female delinquents in the total number of new admissions was $52 \%$ lower than that of male. Majority of the newly admitted male probationers were aged 15, accounting for $36.8 \%$ of total number of male new admissions, whilst the 16 age group accounted for the lowest percentage ( $5.2 \%$ ). As for the female new admissions, a greater proportion was aged 16 , accounting for $50 \%$ of all female newly admitted probationers, whilst the 15 age group accounted for the lowest percentage (16.7\%).

Regarding probationers released from Young Offenders Institute during this period, the total number was 20, of whom $75 \%$ were male and $25 \%$ were female. The percentage of female released (as a proportion of the total released) was $50 \%$ lower than that of male. Among the male delinquents released, those aged 16, 17,18 and 20 accounted for the majority, with each group's percentage standing at $19.975 \%$ of the total, whilst those aged 14,15 and 19 represented the lowest figures (each standing at $6.7 \%$ ). Among female probationers released, the majority was aged 16, accounting for $60 \%$ of all female released, whilst the lowest figures were recorded by the 14 and 15 age groups (each accounting for $20 \%$ of the total).

Source: Macao Prison,2004.
During the period from January to December 2003, there were 549 offenders aged 16-29 detained in prisons across Macao, of whom 490 were male and 59 were female. Among the male prisoners, the majority were aged 26 , accounting for $9.4 \%$ of the total number of male prisoners detained. Among the female prisoners, those aged 21, 25 and 28 accounted for the majority, with each age group's percentage standing at $11.9 \%$ of the total number of female prisoners.

Regarding new admissions to prisons during this period, the total number for the year was 67, of whom $88 \%$ were male and $12 \%$ were female. The percentage of new female prisoners was $76 \%$ lower than that of male. Among the new male prisoners, a greater number of them were aged 26, accounting for $15.3 \%$ of all new male prisoners, whilst those at age 18 accounted for the lowest figure (1.7\%). Among the new female prisoners, the majority were aged 27 , accounting for $25 \%$ of all new female prisoners, whilst the figures for the age groups of 18 , $20,21,22,25$ and 28 were the lowest (the five groups together made up $75 \%$ of total).

As for offenders released from prisons, the total number for the period stood at 75 , of whom $73 \%$ were male and $27 \%$ were female. The percentage of female prisoners released as a proportion of the total number released was $46 \%$ lower than that of male. Among the male prisoners released, the majority were in the 18 and 27 age groups, the two groups together made up $29 \%$ of all the males released, whilst the figure for the 23 age group was the lowest ( $1.8 \%$ ). Among the female prisoners released, the majority were aged 24 , accounting for $15 \%$ of all female released, whilst the lowest figure was recorded by the age groups of $16,17,18,20,23,26$ and 29 (these groups together made up $35 \%$ of the total).
