# How to Make a Paper Shirt

◎ *Carmen Leong*

Materials:

A square piece of paper

A pair of scissors

Steps:

1. Prepare a square piece of paper. Fold it in half and cut it to form a rectangular shape.
2. Turn 1/3 of the rectangle up. Then, fold the figure in half.
3. Fold the two edges of the sheet towards the middle.
4. Fold the left and right flaps towards the sides respectively, forming a "V" shape.
5. Flip a small part of the other end of the paper over. Then, fold the left and right corners towards the middle to create a triangle. This forms the collar.
6. Bring the "V" shape up and tuck it under the collar. Here comes the paper shirt.
